

## **6 Reasons Why You Should Choose SUNVUE**

### **# 1 - New Zealand Content**

- We are a locally owned family business.
- Our aluminium is extruded in Hamilton by INEX and not imported from overseas.
- The powder coating process is conducted locally by Trifold Powder Coaters.

Why is this important? Your money stays in New Zealand and supports kiwi companies and kiwi jobs.

### **# 2 - Aluminium Framing**

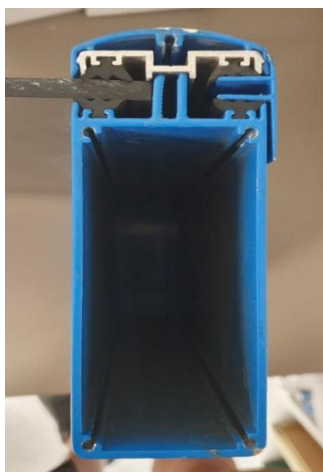

The SUNVUE Galaxy® and Halo® structures are made of 6060 aluminium framing and not steel.

This ensures a structure that will not rust over time and is easy to maintain.

### **# 3 - Acrylic Roofing Panels – SUNVUE Galaxy®**

The SUNVUE Galaxy® utilises 6 mm thick acrylic roofing panels mounted between our custom designed aluminium extrusion with rubber seals.

This ensures a watertight seal and most importantly, is a very quiet structure in the wind and the rain. No rattles, flexing panels or deafening drumming noises.

#### **# 4 – 99% U.V. Protection**

Whether it is the Polycarbonate or Acrylic roofing panels you choose, you will enjoy 99% U.V. protection.

This ensures a safe outdoor living space for the whole family to enjoy.

Your outdoor furniture will also have an extended life span as well.

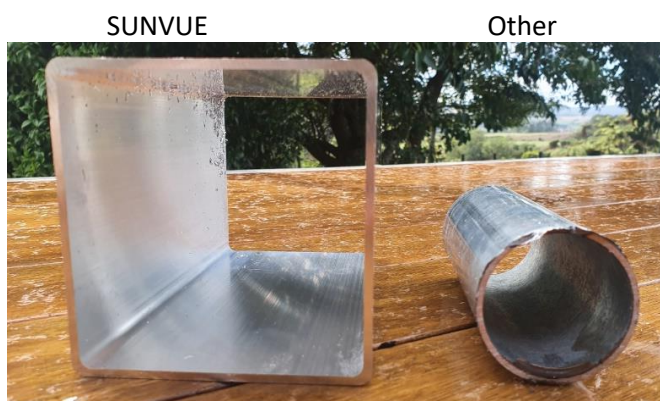

#### **# 5 – Aluminium Profiles**

We want your pergola to be the best. Our commitment is to endeavour to use the best material options available.

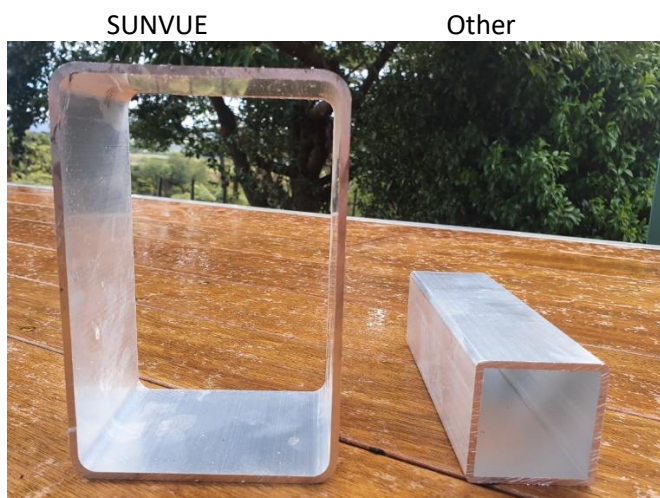

Our post and beam profiles are larger than most on the market.

This is important as it ensures a stronger structure. Another benefit is that it quite simply looks more appealing.
