

**Docril**<sup>®</sup>  
solution dyed acrylic

## If it's not Docril<sup>®</sup>... it's just fabric

Docril<sup>®</sup> solution dyed fabrics for awnings, marine, parasol, and outdoor furniture are well known in Europe, Asia, Australia & New Zealand. We believe in providing our customers with superb quality product, large colour & pattern selection and industry leading 10-year product warranty.

Docril<sup>®</sup> uses Teflon<sup>®</sup> in the finishing process. Teflon<sup>®</sup> protects the fabric, creating a barrier which reinforces the water repellence and delays the dirt adherence.

## Cleaning and Maintenance

We recommend cleaning your Docril<sup>®</sup> fabric with a soft-bristled brush and rinsing with water. For localised stains, clean with a neutral detergent mixed in lukewarm water and rinse.

When used in awnings, it is very important to allow fabric to dry completely before folding it. Should it be necessary to fold the awning while the fabric is still damp, it can be dried with air (under no circumstances should hot air be used), although the fabric dries out very quickly thanks to its technical characteristics.

Docril fabrics can be dry ironed (below 66°C) using the synthetics setting. Do not steam iron.

## Warranty

### 10 Year warranty

During this period, it covers any abnormal deterioration of the physical properties and colour of Docril<sup>®</sup> fabric, given that maintenance advice has been properly followed.
